Summary

Junior Android Developer with a Bachelor's degree in Computer Science and hands-on Flutter cross-platform experience. Builds native Android apps with Kotlin and Jetpack Compose, and cross-platform apps with Flutter and Dart, using Clean Architecture, MVVM/MVI, and dependency injection (Hilt, Dagger, Koin). Comfortable with REST APIs, Firebase, and local persistence (Room, SQLite). Shipped a portfolio of 10+ apps solo, in teams, and under contract, with exposure to Kotlin Multiplatform and CI/CD. A collaborative, reliable, and persistent problem-solver with strong analytical thinking who debugs and resolves issues quickly, values code reviews, and is eager to learn from senior developers.

Education

- 9-Month Diploma - Mobile Applications Development (Native)** · ITI Oct 2025 - Present
- Intensive training at the Information Technology Institute, Ministry of Telecommunications and Information Technology, specializing in native and cross-platform mobile architectures.
- B.Sc. in Software Industry and Multimedia (SIM)** · Alexandria University, Faculty of Science Sep 2021 - Jun 2025
- Department:** Computer Science (CS).
 - GPA:** 3.45 (Excellent with Honors).

Experience

- Flutter Developer (Contract)** · MaVoid Oct 2024 - Oct 2025
- Architected and maintained high-performance cross-platform mobile applications using Flutter and Dart in a hybrid work environment.
 - Collaborated with the team through code reviews and pair debugging to resolve issues and maintain code quality.

Internships

- App Development** · CodeAlpha Sep 2024 - Oct 2024
- Developed and deployed 3 cross-platform mobile applications using Flutter and Dart, serving multiple active test users.
 - Optimized REST API calls and implemented efficient state management, increasing app responsiveness.
- Big Data Track** · Telecom Egypt Jul 2024 - Aug 2024
- Analyzed 10,000+ records using Power BI and SQL to identify key operational trends.
 - Achieved "Best Project" recognition for a Breast Cancer Diagnosis Prediction Tool using machine learning.

Technical Skills

- Languages:** Kotlin, Java, Dart, Swift, SQL, C++
- Android (Native):** Jetpack Compose, Material Design, UI Design, XML, Activities, Fragments, Services, Content Providers, RecyclerView, WorkManager, Navigation Component
- Flutter & Cross-Platform:** Flutter, Dart, Cubit, Bloc, Kotlin Multiplatform (KMP), Compose Multiplatform
- Architecture:** Clean Architecture, MVVM, MVI, MVP, MVC, OOP (Object-Oriented Programming), Modularization, SOLID, Design Patterns
- State & Persistence:** Coroutines, Flow (StateFlow, SharedFlow), RxJava, Room, SQLite, Hive, Offline-First Caching
- Networking & APIs:** Retrofit, Ktor Client, REST APIs, Kotlinx Serialization, Gson, Firebase (Auth, Firestore, Realtime DB), Shopify Admin API, Paymob SDK, Google Maps, Mapbox
- Testing & Quality:** JUnit, MockK, Turbine, Unit & Integration Testing, Code Reviews, Debugging
- Tools:** Version Control (Git, GitHub), CI/CD, Hilt, Dagger, Koin, Dependency Injection, Android Studio, Figma
- AI Integration:** Local LLMs (Ollama), Gemini API, Groq LLM & Whisper API

Projects

NutriScan | AI Nutrition & Fitness Tracker (ITI Graduation Project) Android · Kotlin · MVI · Modularization · Clean Arch · Koin

- Modular, MVI-driven Android app that scans food for nutritional breakdown and builds user profiles accounting for allergies and health conditions to personalize dietary guidance.
- Tracks calories, steps, and workouts, with an AI chatbot supporting voice and text interaction for real-time advice.

WearZone | AI Fashion M-Commerce (ITI Workshop Project) Android · Kotlin · Jetpack Compose · Clean Arch · Hilt

- Collaborated in a 4-person team on a multi-module fashion e-commerce app, integrating the Shopify Admin API, Firebase auth/sync, and Paymob payments.
- Built an AI shopping assistant powered by Groq's LLM and Whisper APIs, plus Mapbox geocoding and WorkManager notifications.

PixelCast | 8-Bit Weather Forecast (ITI) Android · Kotlin · Jetpack Compose · MVVM

- Offline-first weather app integrating the OpenWeatherMap API for reliable forecasts without network access.
- Built a bespoke 8-bit Jetpack Compose UI library and lock-screen-breaking alarms using AlarmManager.

Champion Codex | League of Legends Companion Guide (ITI) Android · Kotlin · Jetpack Compose · Room · Retrofit

- Offline-first companion app using Room Database for 20+ champion stats.
- Adaptive UI with custom Compose progress bars to visualize combat ratings dynamically.

Preperoni | Recipe Discovery & Meal Planner (ITI) Android · Java · MVP · Retrofit · RxJava 3 · Room DB

- Recipe discovery and weekly meal scheduler using TheMealDB API, eliminating scheduling conflicts.
- Synced user data across Firebase (Cloud) and Room (Local) for offline-first favorites and multi-method auth.

Newsly | Kotlin Multiplatform News Reader (ITI) Kotlin Multiplatform · Compose · Ktor · Android & iOS

- Cross-platform news reader sharing networking, data models, and presentation logic between Android and iOS using Ktor Client and Kotlinx Serialization.
- Category-based headline browsing, live search, and article bookmarking on Jetpack Compose.

DocDesk | Medical & Clinic Management (Faculty Graduation Project) Flutter · Dart · WebSockets · AI

- Healthcare app connecting patients, doctors, and clinic admins with real-time data synchronization.
- Integrated OpenAI/Whisper to process voice-to-text summaries, reducing administrative time.

CoinPulse | Cryptocurrency Tracking App (ITI) Flutter · Dart · Firebase · Hive · API Integration

- Cryptocurrency tracking app using Firebase and Hive local databases for reliability and offline functionality.
- Interactive market graphs and real-time coin conversion for a simulated wallet portfolio.

LinguaLeap & QuizDeck | Language Learning & Flashcard Quiz Apps (CodeAlpha) Flutter · Dart · Cubit · REST APIs

- Language-learning platform with progressive lessons, XP tracking, and full Arabic/English localization using Cubit.
- Flashcard quiz app with auto-generated API quizzes, history tracking, and debounced search.

Sportiva App (ITI) iOS · Swift · UIKit · MVP · CoreData

- Cleanly architected iOS sports tracking app using MVP, Alamofire, and CoreData for offline favorites.
- Responsive UIKit interfaces with Storyboards and Compositional Layouts, achieving over 90% unit test coverage.

Honors & Awards

Best Intern · CodeAlpha	Oct 2024
Best Intern & Project · Telecom Egypt	Aug 2024

Extracurricular Activities

React Mentor · Semi Colon Civil Work	Jun 2023 - Oct 2023
Mentored 20+ students in web development fundamentals including HTML, CSS, and React.	

Languages

Arabic: Native Speaker | English: Professional Working Level

Additional Information

Nationality: Egyptian | Gender: Male | Military Status: Currently Serving (Ends Dec 2026) | Age: 23
